EDUCATION

Texas A&M University

Dec. 2027

Bachelor of Science in Computer Science, GPA: 3.947

College Station, TX

- Relevant Coursework: Data Structures and Analysis of Algorithms, Computer Organization, Software Engineering, Computer Systems, Programming Languages, Linear Algebra, Discrete Mathematics, Introduction to C++

EXPERIENCE

Undergraduate Peer Teacher

Aug. 2025 – Present

Texas A&M University College of Engineering

College Station, TX

- Guided 100+ students in understanding key programming concepts (loops, file I/O, data structures, debugging).
- Led weekly office hours, lab sections, and graded 25+ assignments and quizzes per week.

Software Engineering Intern

Jun. 2025 – Jul. 2025

KonfHub

Remote

- Built a prototype agentic AI system for autonomous event description and poster generation with **Amazon Bedrock**-hosted **Claude Sonnet 4** and **Strands Agent SDK** in **Python**, cutting manual design time by 70%.
- Developed and optimized parameterized **LLM prompt templates** and multi-turn prompt-chaining logic, improving content accuracy by 65% and reducing formatting errors from 25% to 3% through iterative testing.
- Implemented and tested custom **RESTful APIs** in **Flask** for AI-driven content generation, validating with **Postman** and integrating Canva **MCP** to automate poster workflows, producing 20+ consistent designs.

Secretary

May 2025 – Present

Texas A&M Chinese Student Association

College Station, TX

- Built a full-stack **Supabase** and **PostgreSQL** system, automating tracking for 400+ events per semester.
- Created **CSA website** with **Next.js**, **Typescript**, and **Tailwind CSS**, improving recruitment by 20%.
- Developed a **Discord bot** using **Node.js** and **Discord.js** to automate operations for 300+ members.

Robotics Engineer

Aug. 2024 – Present

Aggie Robotics - VEXU Team WHOOP

College Station, TX

- Designed and programmed 10+ autonomous routes in **C++** leveraging a custom path-planning library, ReveilLib, which increased match scoring by 35% and elevated team ranking from 10th to 2nd out of 18 teams.
- Debugged sensor-related integration issues with motion, optical, IMU gyroscope, and through-bore encoders, enhancing robot localization reliability and decreasing positioning errors by 80%.
- Team Accomplishments: Excellence Award and Robot Skills Champion @ Texas VEXU Competition, #2 Seed @ 2025 VEXU World Championship, Design Award and #4 Seed @ 2026 VEXU World Championship.

Software Engineering Intern

Jun. 2024 – Aug. 2024

Preseed Stealth Startup

Remote

- Built a proof-of-concept RAG-based data extractor for Indian legal case file PDFs with **OpenAI API**, **ChromaDB** vector embeddings, and **Python**, enabling semantic search.
- Created 4+ interactive wireframes for a legal AI assistant using **Figma** and **Flutter**, displaying user flow.

PROJECTS

SecureSimple

Nov. 2024

- Designed an electronic security and alarm activation system in **Multisim** with sensor-based intruder detection.
- Won 2nd Place in the *SEC Ignite Design Challenge* - Electrical Engineering category.
- Produced a technical report and presentation video detailing system design, functionality, and market analysis.

FooDono | <https://github.com/akhilk999/FooDono>

Aug. 2020 – Dec. 2020

- Developed a mobile app connecting food banks with visitors using **Flutter**, **Firebase**, and **Google Maps API**.
- Won *Honorable Mention* in the *Congressional App Challenge* - Texas District 3.
- Implemented scheduling for food banks with visitor sign-ups, reducing overcrowding and streamlining distribution.

TECHNICAL SKILLS

Languages: C++, Python, Dart, Java, C#, SQL, Haskell, JavaScript, TypeScript, HTML, CSS

Frameworks: Flask, Next.js, Flutter, Tailwind CSS, Bootstrap

Developer Tools: GitHub, Node.js, AWS/Amazon Bedrock, Firebase, Model Context Protocol (MCP), Postman, Vercel

Libraries: React.js, Discord.js, NumPy, Matplotlib, Pandas
