Education

Texas A&M University Dec. 2027

Bachelor of Science in Computer Science, ***GPA: 3.947*** *College Station, TX*

- Relevant Coursework: Data Structures and Analysis of Algorithms, Software Engineering, Computer Systems, Computer Organization, Programming Languages, Introduction to C++, Discrete Mathematics, Linear Algebra

Experience

Software Engineering Intern May. 2026 – Jul. 2026

BroadAxis *Plano, TX*

- Engineered a multi-tenant event-intelligence and CRM platform using **Python**, **FastAPI**, **React**, and **PostgreSQL**, supporting 5 client users across 6 industry verticals.
- Developed multi-agent discovery and enrichment pipelines on **Azure** to search, scrape, extract, deduplicate, and score event data, implementing retries and rate limiting under App Service timeouts.
- Automated internal event discovery and evaluation workflows, saving 4–5 hours of manual work per week, and streamlined frontend and backend deployments with **Azure DevOps** CI/CD pipelines and health-check gates.

Robotics Engineer Aug. 2024 – Present

Aggie Robotics - VEXU Team WHOOP *College Station, TX*

- Increased autonomous match scoring by **35%** by developing **10+** autonomous routines in **C++** using PROS and **ReveilLib**, helping improve division seeding from **10th** to **2nd** among 18 teams at VEXU Worlds.
- Reduced robot positioning errors by **80%** by debugging sensor integrations and combining odometry with distance-sensor wall alignment.
- Created aggierobotics.com to showcase our team, attract prospective members, and display sponsor information.

Software Engineering Intern Jun. 2025 – Jul. 2025

KonfHub *Remote*

- Developed a **Python** backend proof of concept that generated event descriptions, SEO keywords, and poster assets from structured event data using **Amazon Bedrock**, **Gemini**, and a provider-agnostic generation layer.
- Improved content accuracy by **65%** and reduced formatting errors from **25% to 3%** through parameterized prompt templates, multi-turn prompt chaining, and iterative evaluation.
- Integrated Canva MCP to generate **20+** branded design variations and evaluated **23** Amazon Bedrock foundation models using consistent prompts to assess text-generation quality.

Undergraduate Teaching Assistant Aug. 2025 – Present

Texas A&M University College of Engineering *College Station, TX*

- Mentored **100+** students in **Python** and **Go** across three engineering and physics courses through in-class support, office hours, and asynchronous debugging help.
- Evaluated **60+** submissions weekly using Canvas and Gradescope, developing grading rubrics and teaching systematic debugging and dry-run techniques.

Projects

CSA Points Platform | GitHub | points.csatamu.org Mar. 2026 – Present

- Built a production full-stack points platform using **Next.js**, **Supabase**, and **PostgreSQL**, implementing **Google OAuth**, role-based access control, and **20+** PostgreSQL functions/RPCs.
- Replaced spreadsheet-based attendance tracking with QR-code check-in, officer dashboards, automated point calculations, and Google Calendar synchronization for a **250+** member organization.
- Automated recurring event publishing and semester operations with **GitHub Actions** and **PostgreSQL** triggers, reducing reliance on manual spreadsheet updates and documenting workflows for future officers.

Technical Skills

Languages: Python, C++, Go, TypeScript, JavaScript, SQL, HTML/CSS
Frameworks & Libraries: FastAPI, React, Next.js, Flask, Tailwind CSS
Cloud & Databases: PostgreSQL, Azure App Service, Azure DevOps, AWS (Amazon Bedrock), Supabase
Developer Tools: Git, GitHub, Postman, GitHub Actions, Vercel, Cloudflare
