EDUCATION

Texas A&M University

Dec. 2027

Bachelor of Science in Computer Science, GPA: 3.947

College Station, TX

- Relevant Coursework: Data Structures and Analysis of Algorithms, Computer Organization, Software Engineering, Computer Systems, Programming Languages, Linear Algebra, Discrete Mathematics, Introduction to C++

EXPERIENCE

Software Engineering Intern

May. 2026 – Jul. 2026

BroadAxis

Plano, TX

- Developed core features for **Cirklo**, a multi-tenant AI-powered growth platform using **React**, **FastAPI**, and **PostgreSQL**, designing **115+** **REST APIs**, **30** database tables, and tenant-aware **RBAC** authentication.
- Automated CRM workflows and event intelligence by building **AI-powered** pipelines for event discovery, enrichment, contact management, follow-up generation, and relationship tracking using **SearXNG**, **Playwright**, and **LLMs**.
- Reduced deployment time by **80%** by creating **Azure DevOps CI/CD** pipelines for automated testing, deployment, scheduled event scraping, and data enrichment across **Azure App Service** and **PostgreSQL**.

Undergraduate Teacher Assistant

Aug. 2025 – Present

Texas A&M University College of Engineering

College Station, TX

- Mentored **100+** engineering students in **Python** and **Go** through weekly labs, office hours, and individualized debugging support for introductory programming courses.
- Led weekly office hours, lab sections, and graded 25+ assignments and quizzes per week.

Software Engineering Intern

Jun. 2025 – Jul. 2025

KonfHub

Remote

- Reduced manual design time by **70%** by building an **agentic AI** system for automated event descriptions and poster generation using **Amazon Bedrock**, **Claude Sonnet 4**, **Strands Agent SDK**, and **Python**.
- Improved content accuracy by **65%** and reduced formatting errors from **25% to 3%** by optimizing parameterized prompts and multi-turn prompt chaining through iterative evaluation.
- Automated AI-powered poster generation by developing **Flask REST APIs**, validating endpoints with **Postman**, and integrating **Canva MCP** to produce **20+** branded designs.

Robotics Engineer

Aug. 2024 – Present

Aggie Robotics - VEXU Team WHOOP

College Station, TX

- Increased autonomous match scoring by **35%** by programming **10+** autonomous routines in **C++** using **ReveilLib**, improving team ranking from **10th** to **2nd** of 18 teams.
- Reduced robot positioning errors by **80%** by debugging motion, optical, IMU, and encoder integration for reliable robot localization.
- Team Accomplishments: Excellence Award and Robot Skills Champion @ Texas VEXU Competition, #2 Seed @ 2025 VEXU World Championship, Design Award and #4 Seed @ 2026 VEXU World Championship.

PROJECTS

CSA Website | [GitHub](#) | points.csatamu.org

Jun. 2025 - Jul. 2026

- Built a production full-stack web platform using **Next.js**, **Supabase**, and **PostgreSQL** with **Google OAuth**, **RBAC**, and 20+ PostgreSQL functions to manage organization operations.
- Replaced spreadsheet-based attendance and points tracking by developing **QR check-in**, officer dashboards, automated point calculations, and **Google Calendar** synchronization for **250+** organization members.
- Automated semester operations through scheduled event publishing, **PostgreSQL triggers**, and **Google APIs** supporting attendance, leaderboards, and administrative workflows.

SecureSimple

Nov. 2024

- Designed an electronic security system with sensor-based intruder detection and alarm activation using **Multisim**.
- Earned 2nd Place in the *SEC Ignite Design Challenge* (Electrical Engineering).

- Produced technical documentation and a presentation analyzing system architecture, functionality, and market feasibility.

FooDono | [GitHub](#)

Aug. 2020 – Dec. 2020

- Developed a **Flutter** mobile application using **Firebase** and **Google Maps API** to connect food banks with nearby visitors.
- Streamlined food distribution by implementing appointment scheduling and visitor sign-ups to reduce overcrowding.
- Earned *Honorable Mention* in the *Congressional App Challenge* (Texas District 3).

TECHNICAL SKILLS

Languages: C++, Python, Go, Java, C#, SQL, TypeScript, JavaScript, Dart, HTML/CSS, Haskell

Frameworks & Libraries: React, Next.js, FastAPI, Flask, Flutter, Tailwind CSS, Bootstrap, NumPy, Pandas, Matplotlib

Cloud & Databases: Azure App Service, Azure DevOps, Azure PostgreSQL, Azure Static Web Apps, AWS (Amazon Bedrock), Supabase, PostgreSQL, Firebase

Developer Tools: Git, GitHub, MCP, Postman, Node.js, Vercel
