EDUCATION

Texas A&M University

Dec. 2027

Bachelor of Science in Computer Science, GPA: 3.947

College Station, TX

- Relevant Coursework: Software Engineering, Data Structures and Analysis of Algorithms, Programming Languages, Discrete Mathematics, Computer Systems, Linear Algebra, Computer Organization, Introduction to C++

EXPERIENCE

Software Engineering Intern

May. 2026 – Jul. 2026

BroadAxis

Plano, TX

- Built a production multi-tenant event-intelligence and CRM platform (real client tenants) using **Python/FastAPI**, **React**, and **PostgreSQL** with **~100+** REST APIs and a **25**-table schema across 6 industry verticals.
- Shipped multi-agent discovery and enrichment pipelines on **Azure** (search → scrape → LLM extract → dedup/score) with retries, rate limiting, and graceful degradation under App Service timeout constraints.
- Shipped **Azure DevOps CI/CD** (4 pipelines, 10+ steps) deploying frontend (**Static Web Apps**) and backend (**App Service**) with health-check gating on every push to main, plus scheduled discovery and enrichment jobs.

Undergraduate Teaching Assistant

Aug. 2025 – Present

Texas A&M University College of Engineering

College Station, TX

- Mentored **100+** engineering and physics students in **Python** and **Go** across ENGR 102, PHYS 216, and CSCE 120 through in-class help, owned office hours, and Discord/email debugging support.

Software Engineering Intern

Jun. 2025 – Jul. 2025

KonfHub

Remote

- Built a **Python** generative backend POC that turns structured event details into descriptions, SEO keywords, and poster artifacts via chained **Amazon Bedrock / Gemini** calls and a provider-agnostic OOP generation layer.
- Improved content accuracy by **~65%** and reduced formatting errors from **25% to 3%** by optimizing parameterized prompts and multi-turn prompt chaining through iterative evaluation.
- Evaluated **23** Bedrock foundation models on identical prompts, selected Amazon Nova Micro for the POC text stage, and integrated Canva MCP to produce **20+** branded designs during experimentation.

LEADERSHIP

Secretary

May 2025 – Present

Texas A&M Chinese Student Association

College Station, TX

- Replaced Sheets/Forms with a **Next.js/Supabase** platform tracking **400+** events/semester for **250+** members.
- Shipped csatamu.org as Public Relations Chair, improving recruitment by **20%** versus Instagram-only outreach.
- Wrote transfer docs and simplified check-in/roster so officers can run semester ops without the original builder.

Webmaster

May 2025 – Present

Aggie Robotics

College Station, TX

- Rolled out Notion and Drive templates adopted by **50+** members, replacing Discord-only tasking.
- Mentored software members through States/Worlds prep so path-authoring scaled beyond personal ownership.
- Designed the org **Next.js** site and knowledge base so officers share operating docs in one place.

PROJECTS

CSA Points Platform | [GitHub](https://github.com) | points.csatamu.org

Mar. 2026 – Present

- Built a production full-stack points platform using **Next.js**, **Supabase**, and **PostgreSQL** with TAMU **Google OAuth**, role-based access, and **20+** PostgreSQL functions/RPCs for organization operations.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, C++, Go, HTML/CSS

Frameworks & Libraries: React, Next.js, FastAPI, Flask, Tailwind CSS

Cloud & Databases: PostgreSQL, Supabase, Azure App Service, Azure DevOps, AWS (Amazon Bedrock), Firebase

Developer Tools: Git, GitHub, Notion, Postman, Vercel, VS Code, Node.js
